USER STORY / TASK

- Developer comment
- Developer TL comment
- **BRANCH COMMENT** – sanity and UI verification
- Once the all modules are ready with Unit testing comment from Developer and branch testing comment from tester then it will ready for INTEGRATION
- Developer TL or Sr. Developer will do INTEGRATION and Development Team will do INTEGRATION TESTING.
- **After INEGRATION TESTING build will be move to SIT Environment**
- As a Tester we will do Sanity and if everything is working fine then we will start for actual Testing
- We will start to run or Execute test Cases
- While running test case if a single step is fail then we have to raise bug to respective developer
- After fixes we have to retest and close the bug
- Once all the test cases are run and pass for this USER STORY then we will enter our **BUILD COMMENT**
- **Build comment include –** All the test case run id, additional verification comment, screenshot.
